

Visualizing And Predicting Heart Diseases With An Interactive Dash Board

Team ID : PNT2022TMID39696

Team Leader : MUKESHBABU M

Team member : SUJITH N

Team member : PRASATH T

Team member : JAGGESH M

Loading the Dataset

Before you can build a view and analyze your data, you must first connect the data to IBM Cognos. Cognos supports connecting to a wide variety of data, stored in a variety of places.

The data might be stored on your computer in a spreadsheet or a text file, or in a big data, relational, or cube (multidimensional) database on a server in your enterprise.

In our case, we will be using a spreadsheet or text file for making our analysis.

Load data from **Heart_Disease_Prediction.csv** file which consist of **14 Columns**.
